Southern Alberta Institute of Technology (SAIT), Calgary, AB
January 2025 – August 2026 (Expected)

Key concepts:

- Object-oriented programming fundamentals
- Integration and web fundamentals (REST APIs)
- Relational databases and structured data skills
- Cloud computing fundamentals (Azure)
- Software testing fundamentals

EMPLOYMENT EXPERIENCE

Software Engineer & Project Manager - Volunteer

Calgary Opera, Calgary, AB
January 2026 – August 2026 (In Progress)

- Managed a team of 3 engineers to gather client requirements and deliver a full-stack web application solution using Agile development methods.

- Utilised JIRA for sprint planning, breaking down project tasks, and identifying progress, blockers and risks; exposure to Confluence.
- Used .NET EF Core as an ORM to design entity models and generate a code-first relational database of 20+ tables.
- Designed and built a RESTful API using ASP.NET with full CRUD endpoints across 5 resources.
- Tested and validated API endpoints using Swagger UI, verifying response shapes, HTTP status codes and error handling.

Business Intelligence Analyst

Webster Consulting, Calgary, AB

October 2025 – January 2026

- Rationalized enterprise application dataset of 5k+ records to support internal decision-making.
- Contributed to Disaster Recovery planning by developing structured presentation materials used in company-wide readiness reviews.
- Standardized IT solution documentation, increasing clarity and consistency across internal teams.

Box Office Manager

Calgary Opera, Calgary, AB

October 2021 – October 2024

- Cleaned, processed and analyzed \$3M+ in annual sales data, using data visualization to identify trends and inform leadership decisions.
- Maintained a client database of 50,000+ records with high standards for data integrity and accuracy.
- Developed custom SQL reports used across multiple departments, improving visibility into sales and patron behaviour.
- Built and configured 180+ events across three performance seasons, collaborating with other departments as part of a cross-functional team.
- Developed and standardized operational procedure documentation used across multiple seasons.

Essential Banker

Barclays Bank UK, Weston-Super-Mare, UK

May 2017 – July 2021

- Managed sensitive financial data with strict adherence to security and compliance protocols.
- Designed a triage workflow that reduced client wait times by 20%, improving NPS scores.
- Independently managed the counting house, handling multiple priorities effectively and processing over \$100k+ in transactions daily with zero discrepancies.
- Performed troubleshooting and maintenance on automated teller and banking machines to maintain over 97% uptime.
